DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 15 and 18 are allowed. The prior art discloses a communications system, comprising a plurality of interconnected network elements (NE) with a unique NE identifier (NEID) value and having one or more input and output ports; and each input port being provided for inputting from an adjacent one of the plurality of NEs, a synchronization signal and quality level indication (QLI).

The prior art however fails to disclose a source identifier (SID) value that identifies the input port at which a synchronization signal is input from an adjacent NE, and the SID value of each input port comprising the NEID value of the adjacent NE.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
